RICHARD OLUOCH

IFRS 17 Implementation & Loss Reserving | Actuarial Science × Data Analysis | Python · R · Excel

+254 743 18 9702 | roluoch126@gmail.com | LinkedIn

PROFILE

Actuarial professional with 2+ years of experience in IFRS 17 implementation, loss reserving, and insurance valuations across East Africa. Led an end-to-end IFRS 17 engagement for a general & medical insurer in Rwanda — delivered within 3 months, owning data ingestion, client analysis, disclosure presentations, and reconciliation sign-off. Combines actuarial rigour with data science (Python, R) to produce compliant, auditable, and clearly explainable financial reports. Trusted by finance teams to bridge the gap between actuarial models and boardroom-ready disclosures.

SKILLS

- IFRS 17 End-to-End Implementation & Assumption Reviews
- Actuarial Valuations & Assumption Reviews
- Risk Modelling & Sensitivity Analysis
- Python · R · Excel (Advanced) · VBA
- Client-Facing Disclosure Presentations
- Loss Reserving & Loss Triangles
- Insurance Pricing & Profit Testing
- Data Analytics & Financial Reporting
- Reinsurance & General Insurance

PROFESSIONAL EXPERIENCE

Schools Manager Jun 2026 – Present | Mombasa, Kenya

The Mwezi Foundation

- Conduct regular structured visits to schools across the region, building trusted relationships with head teachers, teachers, and pupils
- Collect, verify, and analyse data on solar light distribution, usage, and pupil academic performance — tracking outcomes for light recipients versus non-recipients
- Prepare and submit weekly field reports to the Country Manager covering school status, data findings, and recommendations
- Manage solar light inventory across schools, coordinating delivery, distribution, and replacement
- Identify and escalate issues such as light misuse or loss, with evidence-based recommendations for corrective action
- Support the Foundation's monitoring and evaluation framework by maintaining accurate records across all assigned schools

Library Fellow Jan 2026 – May 2026 | Likoni, Kenya

Hatua Network

- Managing library services and learner engagement for 350+ students weekly at Ushindi Baptist School — administering materials circulation, registering new users, and tracking usage statistics to maintain accurate program records submitted to supervisors on a weekly basis.
- Building consistent working relationships with 8 teachers and school staff — coordinating session scheduling, communicating library resources and program updates, and responding to school requests in a timely and professional manner via WhatsApp and in-person engagement.

- Supporting student literacy and learning by guiding 300+ learners weekly in book selection, research skills, and reading activities — creating an accessible, welcoming library environment that encouraged voluntary participation and return visits.
- Cataloguing, classifying, and processing 200 new library materials using established classification systems — maintaining organized, retrievable records and contributing to a well-functioning learning resource environment.
- Maintaining accurate attendance and usage tracking records across 10 sessions using manual registers — ensuring data integrity and producing regular usage summaries for the Library Management Team.

Data Clerk Sep 2024 – Nov 2024 | Mombasa, Kenya

Supa Loaf - MIBISCO

- Maintained accurate records of sales, inventory, and production data — achieving 99% data accuracy across 100+ daily entries and ensuring full data integrity for management reporting.
- Prepared and submitted weekly operational reports to management covering sales performance, inventory levels, and production outputs — contributing to 20% improved order fulfilment accuracy.
- Managed data entry and record organization using Excel — demonstrating strong attention to detail, digital tool proficiency, and consistent reliability in data-dependent workflows.

Actuarial Analyst Oct 2023 – May 2024 | Nairobi, Kenya

Actuarial Services (East Africa) Ltd

- Produced clear, well-documented analytical reports translating complex data findings into accessible, actionable insights for diverse stakeholders — demonstrating strong written communication and structured reporting skills.
- Engaged with multiple internal stakeholders to gather, validate, and align data — building skills in stakeholder coordination, follow-up communication, and information synthesis under project deadlines.
- Authored thought leadership articles for professional audiences — demonstrating ability to write structured, engaging content for readers with varying levels of technical background.

Actuarial Assistant Jan 2023 – Sep 2023 | Nairobi, Kenya

Actuarial Services (East Africa) Ltd

- Assisted in data collection, validation, and analysis — supporting production of periodic reports under tight timelines and ensuring consistent data accuracy across all submissions.
- Collaborated with team members to maintain data consistency and documentation standards — developing professional habits of accuracy, follow-through, and deadline compliance.

Actuarial Intern Aug 2022 – Dec 2022 | Nairobi, Kenya

Actuarial Services (East Africa) Ltd

- Supported life insurance valuations, pricing, profit testing, and expense strain calculations under senior actuary supervision.
- Collaborated with internal teams to facilitate IFRS 17 implementation and built interactive project roadmaps for pensions, insurance, and investment departments.
- Researched and modelled insurance pricing for electric vehicles in Kenya — published as an industry article, demonstrating initiative and commercial awareness.

Junior Enumerator Aug 2022 – Mar 2023 | Kwale, Kenya

Educate!

- Conducted 250+ structured baseline, end-line, and follow-on surveys across 10 communities in Kwale County — collecting data on youth development indicators through direct community engagement and structured interview protocols.
- Maintained data quality through systematic follow-up visits and youth engagement — re-contacting 100+ participants to verify and complete survey data, reducing missing data rates and improving overall dataset accuracy.
- Compiled and submitted structured field reports to supervisors following each survey cycle — documenting findings, flagging data quality concerns, and providing recommendations for program adjustments.

- Built working relationships with community members, youth participants, and local stakeholders across Kwale County — developing practical experience in community-level field engagement.
